📞 09778176676   My Portfolio

I am deeply passionate about the startup industry and excel in self-learning and problem-solving. I have confidence in my ability to acquire the skills needed to develop websites using PHP, Laravel, React, Next js and other associated techniques for web development. Currently, I am dedicated to advancing my expertise in Laravel and other related technologies through continuous learning.

Age	23
Date of Birth	9.4.2000
Education	UCSY (University of Computer,Studies Yangon)
Year	4th Year
Major	Cs (Computer Science)
University Projects	HTML Coffee Shop (HTML,CSS) Foodtroplis(HTML, Css, Javascript) Employee Management System with Java Let test your luck (mini game with C#)
Learned Programming Language (at University)	HTML, CSS, Javascript, Mysql, Java, C#, C++
Self-Learning Language	Bootstrap, JQuery, PHP, Laravel, Python, React Js, Astro js, Next js
Contest Experiences	Participated in YeTagun Youth Program and Selected as one of the teams in regional round(2018)
Personal Attributes	Proactive, Punctual, Hardworking, adept at working under pressure and quick to learn new technologies
Language proficiency	HTML, CSS, JavaScript, Tailwind, Bootstrap, Jquery, react js(junior), Next js(Junior), Astro js(Junior), PHP(mid Level), Laravel(mid level)

Launch Project Experiences

Project Title	Language	About Project
Nyanpasu Music (Music website for anime song)	HTML,CSS, JavaScript, Bootstrap, PHP, Mysql	This is my first real-time website. It is associated with anime music videos and offers the option to download the music for offline listening. Additionally, the videos include translated lyrics in English and Burmese. The website features a search function for music, downloads, and allows users to request specific music or translations they would like to see. Furthermore, it includes an admin control panel for page management. Since this is my first project, the code may be a bit complex and messy. Source code at: GitHub view at: http://nyanpasumusic.epizy.com/
RealChat (chat website)	HTML, CSS, JavaScript, Ajax, PHP, Mysql	This is a chat website where users can log in and chat with others who are also logged in. The website includes features for user login, registration, chatting, and displaying the online status of other users. However, please note that, due to some technical errors, this project is temporarily removed from the host server. Source code at: GitHub
Random Quiz	HTML,CSS, JavaScript,Tailwind, Next Js, Zustand (State Management)	The Random Quiz is a web application where users can engage in random quizzes on various topics. Users will be presented with a series of multiple-choice questions randomly selected from a database. After answering the questions, users will receive immediate feedback on their performance, including the correct answers for questions they missed. Source Code at: GitHub view at: https://randomquiz.vercel.app

Real Time Project Experiences

As a Junior Full Stack Developer in a omega zero technology company, I've gained practical experience working on real projects that showcase my web development skills. Here's lists of some of my work:

Projects	Language	About project
Omega POS	HTML, CSS, JavaScript, Bootstrap, Laravel, Vue, and additional technologies.	Developed a comprehensive Point of Sale (POS) system, encompassing employee management, salary calculations, and product details etc…
Omega CRM	HTML, CSS, JavaScript, Tailwind, Laravel, jQuery, and supplementary technologies.	Contributed to the development of a robust Customer Relationship Management (CRM) system.
LinBlock Customer	HTML, CSS, JavaScript, Tailwind, Astro.js (for front-end), Laravel Filament (for back-end)	Collaborated in the creation of the LinBlock Concert Company website, showcasing product prices and various functionalities.
GreatSafe Payroll	HTML, CSS, JavaScript, Tailwind, Laravel Filament	Implemented features for a security company website, facilitating employee attendance tracking (present, absent, leave, overtime) and automating salary calculations based on attendance.
MTF Tennis Court Renting Website	HTML, CSS, JavaScript, Tailwind, Next.js (for front-end), Laravel Filament (for back-end).	Played a key role in developing a user-friendly platform for the Myanmar Tennis Federation, allowing users to rent tennis courts, book coach time slots, and make payments through various channels including KBZ.

I have also been involved in several other web development projects that further showcase my skills and expertise. If you're interested in exploring more of my work, I'd be delighted to provide additional details and examples. Please feel free to contact me via email for further information or access to additional project repositories.

This opportunity will be a significant step in my life and career, and I genuinely want to seize it as a chance to enhance my knowledge and skills while collaborating with great people to create outstanding and effective websites for customers
